Profile

Software engineer and computational scientist with expertise in Rust and Python. I build high-quality software for scientific computing and contribute actively to the Rust open-source ecosystem. I enjoy working in teams that emphasize functionality and reliability and use excellent tooling.

Experience

Doctoral Candidate (University of Freiburg)

since 08/2021

- Study of cellular systems via computational models
- Developed and maintained agent-based simulation framework `cellular_raza`
- Contributed to Open Source projects
- Published peer-reviewed software and scientific papers and reviewed papers

Research Assistant - Tutor (University of Freiburg)

since 04/2020

- Weekly tutorials in Physics, Mathematics and Systems Biology, exams, lectures

Supervisor iGEM (CIBBS, Freiburg)

05/2023 - 09/2024

- Mentored students in scientific modeling, website and science communication

Research Assistant (Fraunhofer Institute ISE, Freiburg)

02/2020 - 04/2021

- Uncertainty estimation for heat pumps, eco-label validation and assignment

Internship (SAP, Walldorf)

08/2017 - 10/2017

- Natural Language Processing, Data Analysis

Education

University of Freiburg

Doctoral Candidate (Computational Systems Biology)

since 08/2021

MSc. Physics (Theoretical Physics & Mathematics),

Thesis: "Zero Values of the TOV Equation" (Prof. Nadine Große)

04/2020-07/2021

Heidelberg University

MSc. Physics

04/2018-04/2020

Bsc. Physics

09/2013-03/2018

Thesis: "About Topological Tunneling Configurations, the Anharmonic Oscillator and the Functional Renormalization Group" (Prof. Jan Pawłowski)

Ottotheinrich-Gymnasium, Wiesloch (High School)

09/2005-06/2013

Skills

In descending order of skill level

Programming Languages

Rust, Python, C++, C, Javascript, Bash

Development Tools

Git, GitHub Actions, Linux, Make, CMake, GitLab CI/CD

Documentation & Publishing

Hugo, Typst, LaTeX, Sphinx, HTML, CSS
